Official Participant Submission Guide: GitHub Workflow & Pull Request Instructions

1. Introduction

Welcome to Season 3 of the National Research & Innovation Challenge by 3SVK. This official guide outlines the standard GitHub workflow required for all registered participants to successfully submit their research files and proceedings for evaluation.

2. Purpose & Objective (Why We Use GitHub)

The primary objective of using GitHub for this challenge is to maintain a transparent, verifiable, and centralized archive of all participant research contributions. Utilizing pull requests ensures that every participant's work is securely logged under their unique GitHub profile, creating an authentic audit trail for evaluation.

3. What to Publish

Participants are required to upload and publish their specific project deliverables to the repository. This includes:

- **Research Paper / Proceedings Markdown file** (e.g., your project documentation or final paper formatted as `.md`).
- Any required supporting framework documentation or structural designs specified for your challenge track.

TEMPLATE :

Lifelong Reusable Intellectual Property & Research Template

1. Title of the Invention / Project

- **Project Name:** [Insert Project Title / System Name Here]
- **Framework Identifier:** [Insert Framework or Challenge Name]

2. Primary Inventors / Applicants (Placeholder Record)

- **Applicant 1:** [Full Name]
 - *Nationality:* [Nationality]
 - *Permanent Address:* [House No, Street, City, State, Postal Code, Country]
- **Applicant 2:** [Full Name]
 - *Nationality:* [Nationality]
 - *Permanent Address:* [House No, Street, City, State, Postal Code, Country]
- **Co-Applicant / Academic Mentor:** [Full Name & Title]

- *Role:* [Designation, Institution/Organization]

3. Core Technical Abstract & Architecture

- **The Problem Addressed:** [Describe the core bottleneck, limitation, or challenge your system solves.]
- **Core Innovation Module 1:** [Describe the first primary technical mechanism, algorithm, or heuristic engine.]
- **Core Innovation Module 2:** [Describe the storage, security, or data persistence layer.]
- **Communication / Synchronization Protocol:** [Describe how data is transmitted, synced, or handled under constraints.]

4. Proven Performance Metrics (Benchmark Reference)

- **Performance Metric 1 (e.g., Speed/Latency):** [e.g., Reduced baseline from X to Y]
- **Performance Metric 2 (e.g., Resource Efficiency):** [e.g., Minimized payload from X to Y]
- **Performance Metric 3 (e.g., Reliability/Uptime):** [e.g., Maintained 100% uptime under stress]

Official Participant Submission Guide: GitHub Workflow & Pull Request Instructions

Step1:

Open Link: <https://github.com/3SVK-Official/3SVK-Research-Series-Season-3>

Step 2:

Click on Fork

Step 3:

Click On Create Fork

Step 4:

Create or Upload file

Step 5:

Click on Pull Request:

Step 6:

Click On New Pull Request:

Step 7:

Click on Create Pull Request:

Step 8:

Final Display:

Note : Submitting the pull request is the core action required on your end, and the organizers will observe your GitHub ID and review the pull request to decide whether to accept and merge it.

Important Submission Instruction:

Once your Pull Request is successfully created, take a screenshot showing your **sent merge/pull request** alongside your **GitHub ID**, and upload it as proof of completion on Unstop along with your GitHub profile link.

Know your Git HUB Id Steps:

Step 1: Click on Circle at the top right of the git hub.

Step 2:

Click on the profile

Step 3:

Upload the link or git hub id from here:

Below The circle and left to he/her/him/-> the unique id is the git hub id

In the top shown link is the git hub link

Need Assistance?

If you encounter any technical issues during the GitHub fork or pull request process, feel free to reach out to the organizing team at **3svkofficial@gmail.com** or via the official support channels on Unstop.
